

The background features two large, light gray footprints, one on the left and one on the right, facing each other. In the upper right corner, there are several concentric, hand-drawn style circles. The overall color palette is a mix of light gray, white, and black.

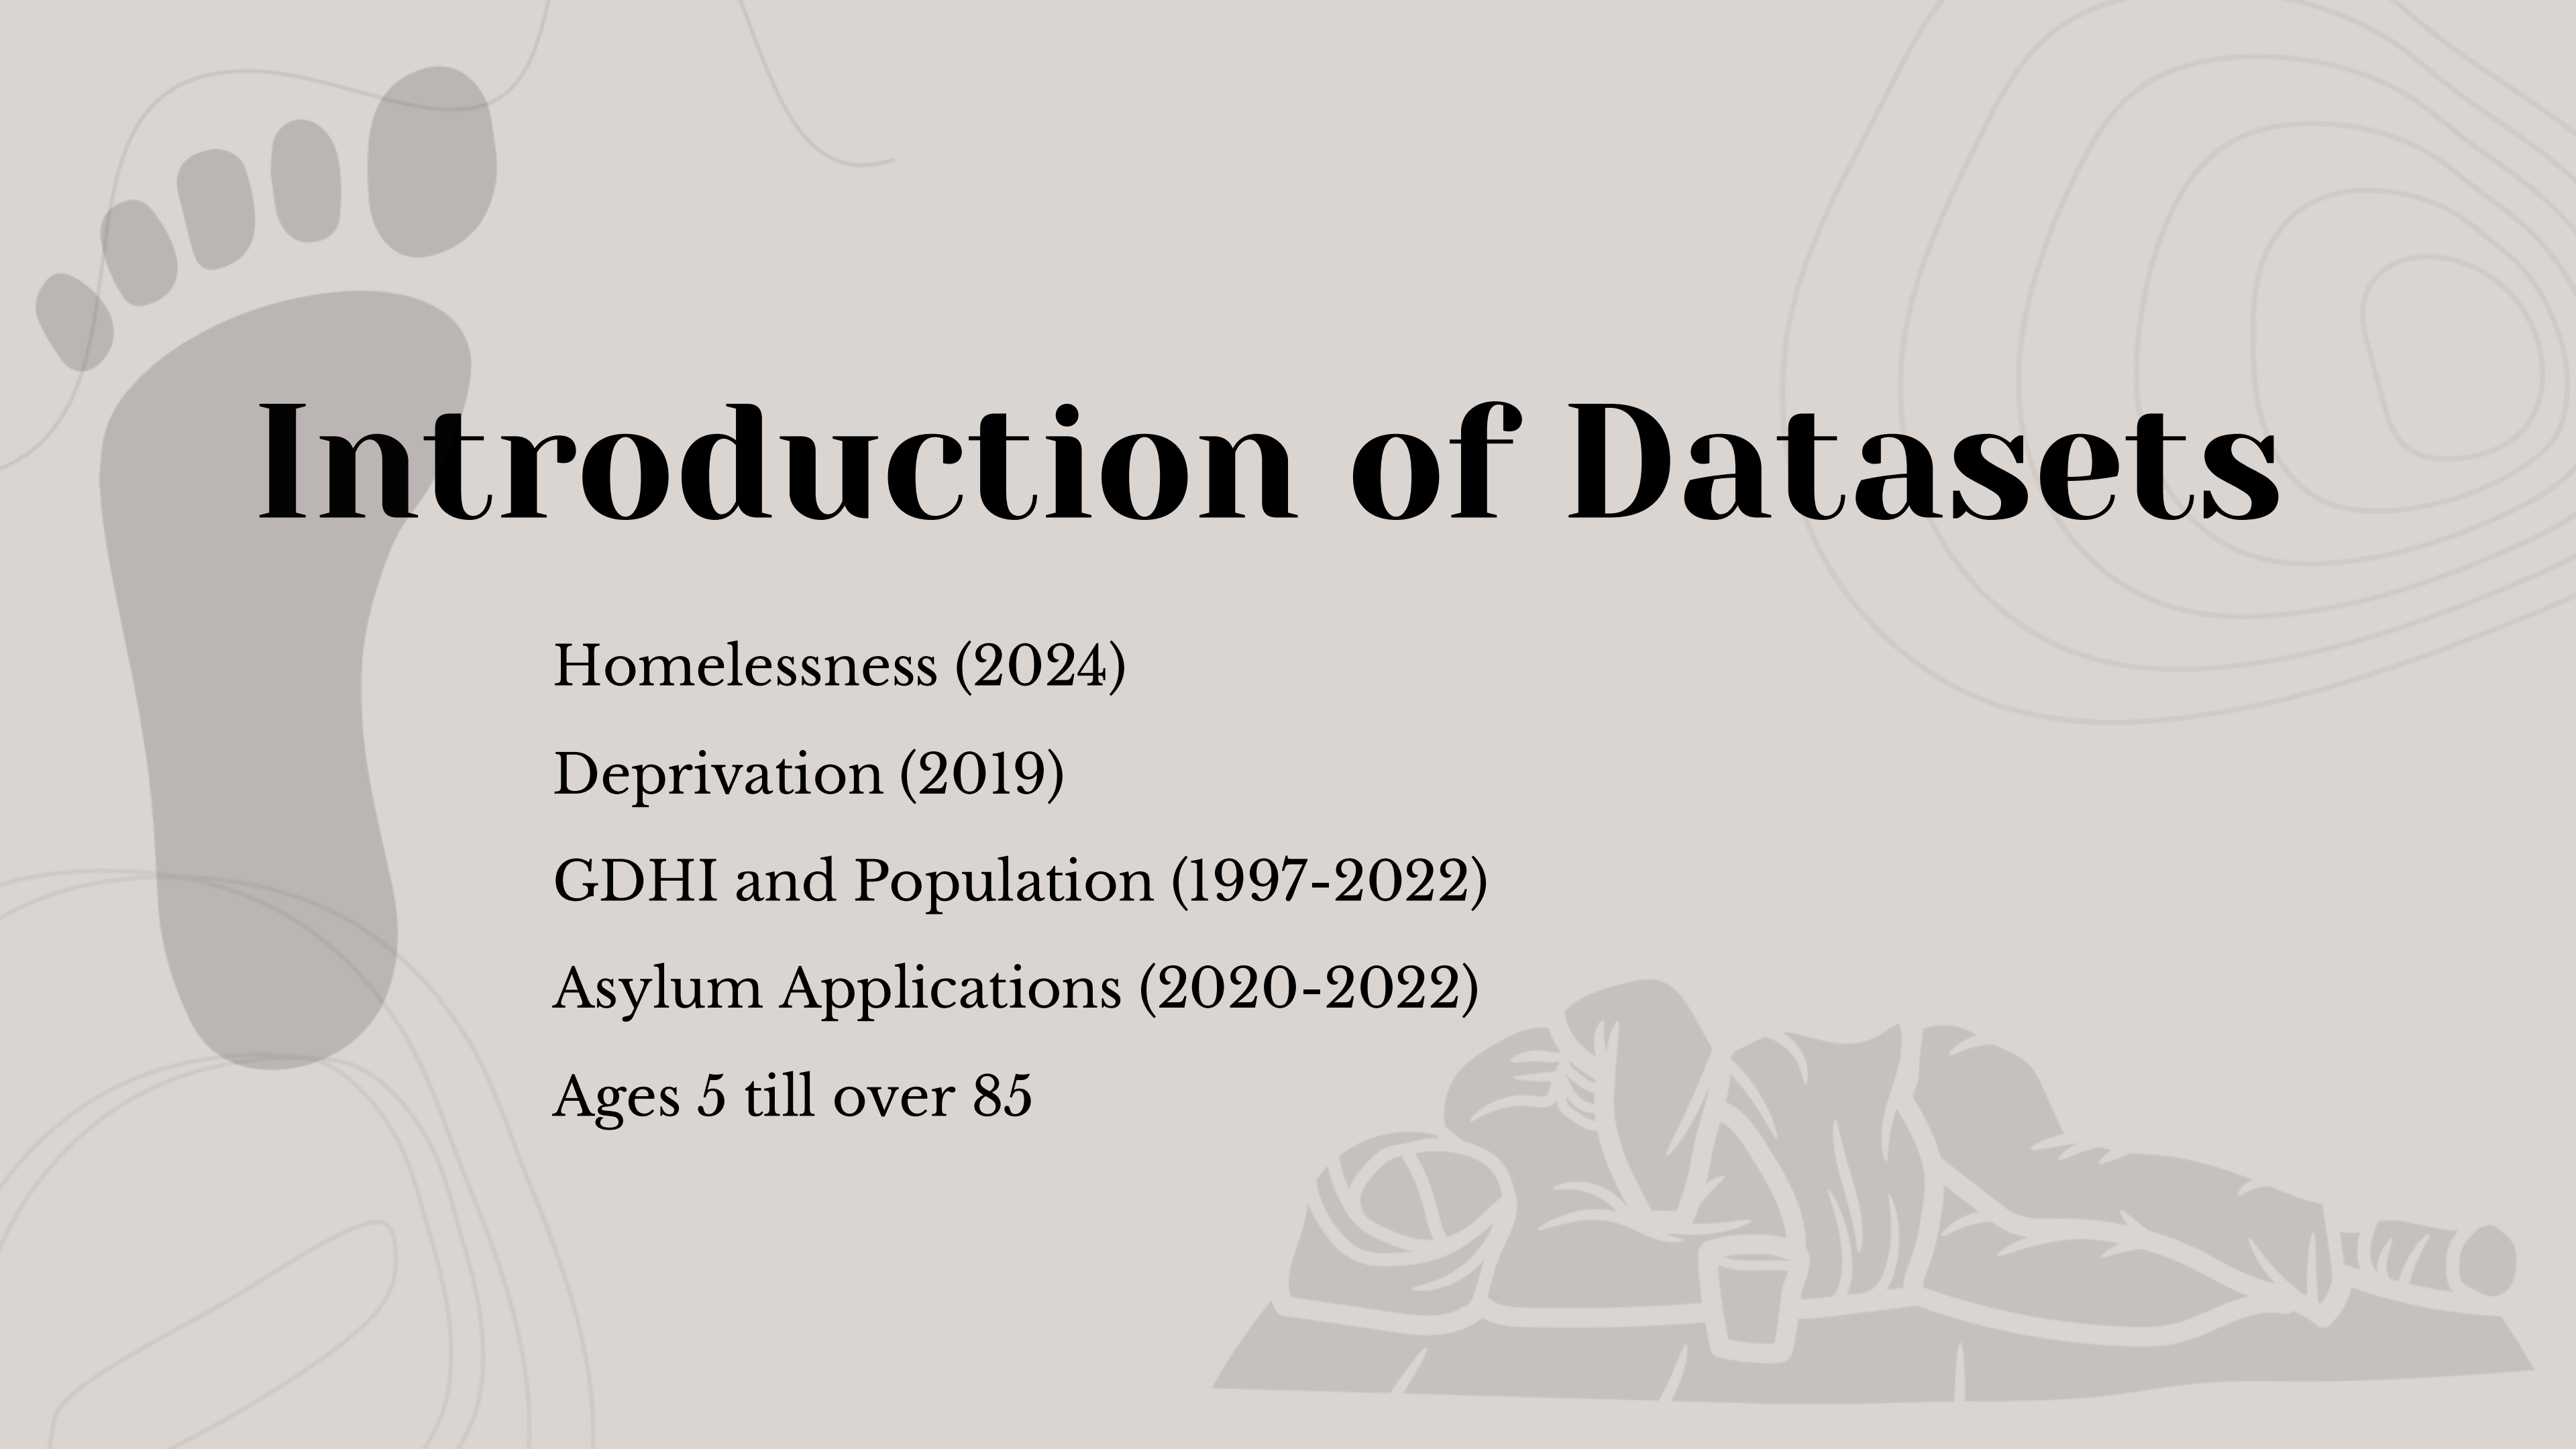

RESOLE

Group 2 : Project Brief B

Overview

- 01** Introduction of Datasets
- 02** Population and Income Deprivation Rate
- 03** Homelessness in 2024
- 04** GDHI and Young Children
- 05** Homelessness and Household Deprivation
- 06** Homelessness and Income Deprivation
- 07** Recommendations

Introduction of Datasets

Homelessness (2024)

Deprivation (2019)

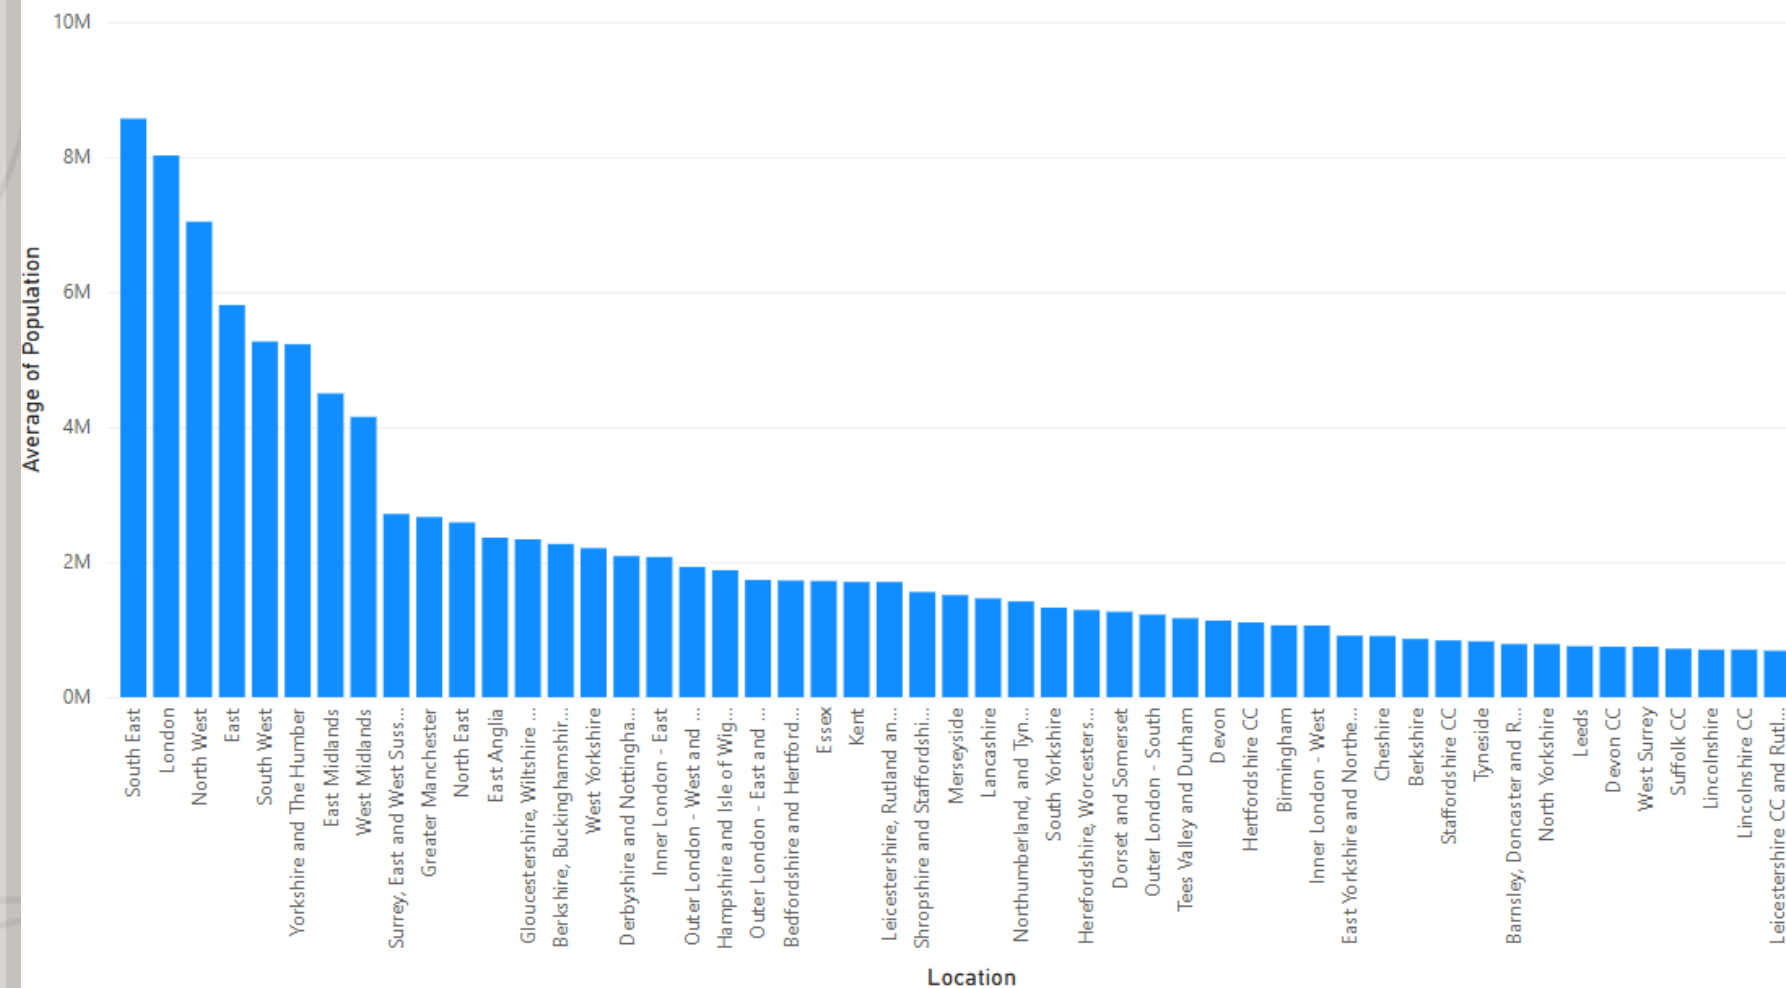

GDHI and Population (1997-2022)

Asylum Applications (2020-2022)

Ages 5 till over 85

INCOME DEPRIVATION AND POPULATION BREAKDOWN

Average Population by Location

Outline

More people --> more houses, roads, buildings --> more area to commute
=
higher need for proper footwear

Most Populated

1. London
2. Birmingham
3. Manchester
4. Liverpool
5. Leeds

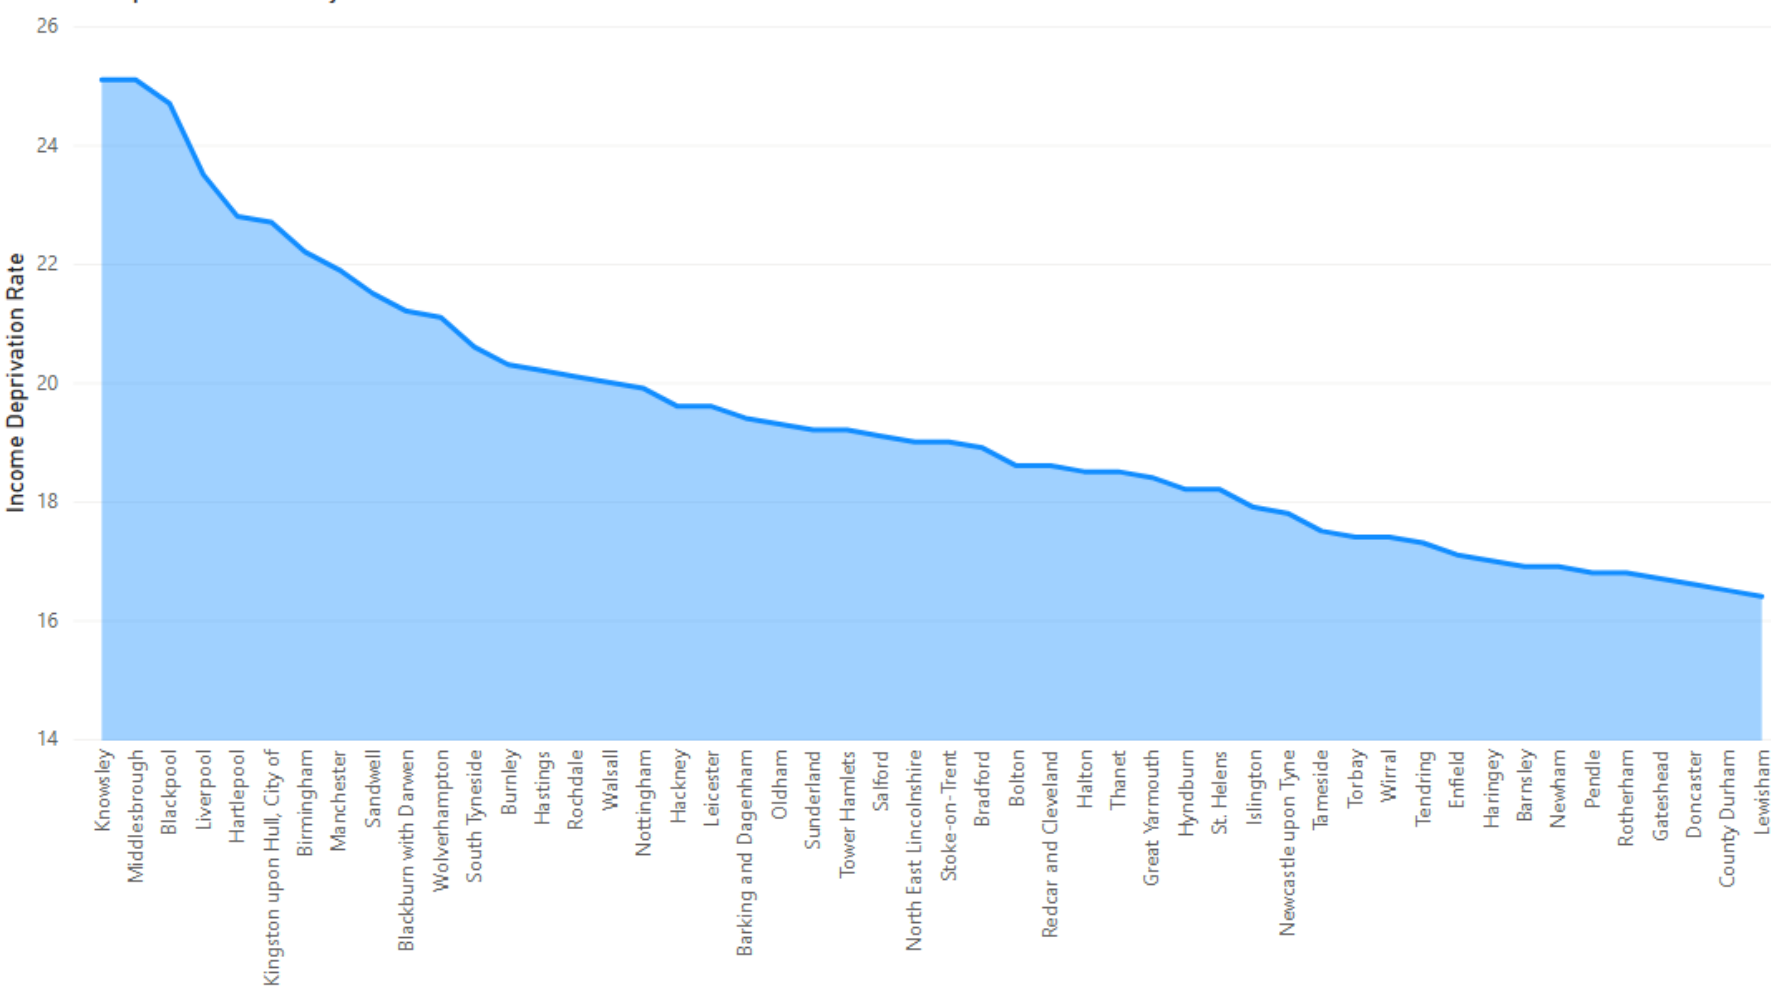

To Note

Deprivation rate is calculated as a proportion of the total population

Most Deprived

1. Knowsley
2. Middlesbrough
3. Blackpool
4. Liverpool
5. Hartlepool

Income Deprivation Rate by Location

IMPACTED AREAS OF HOMELESSNESS: 2024

Top 3 cities impacted

London (3,200)
Birmingham (1,076)
Manchester (1,031)

50%

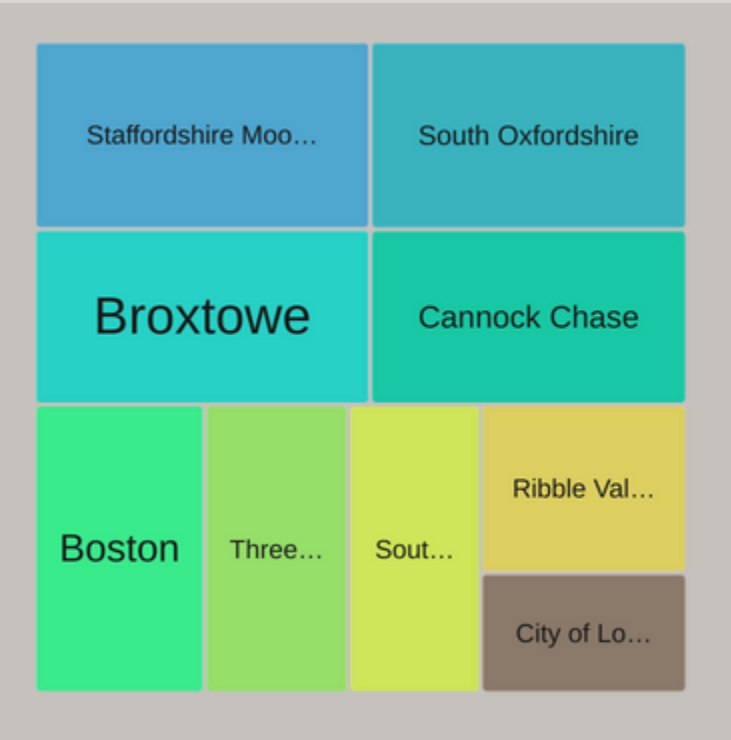

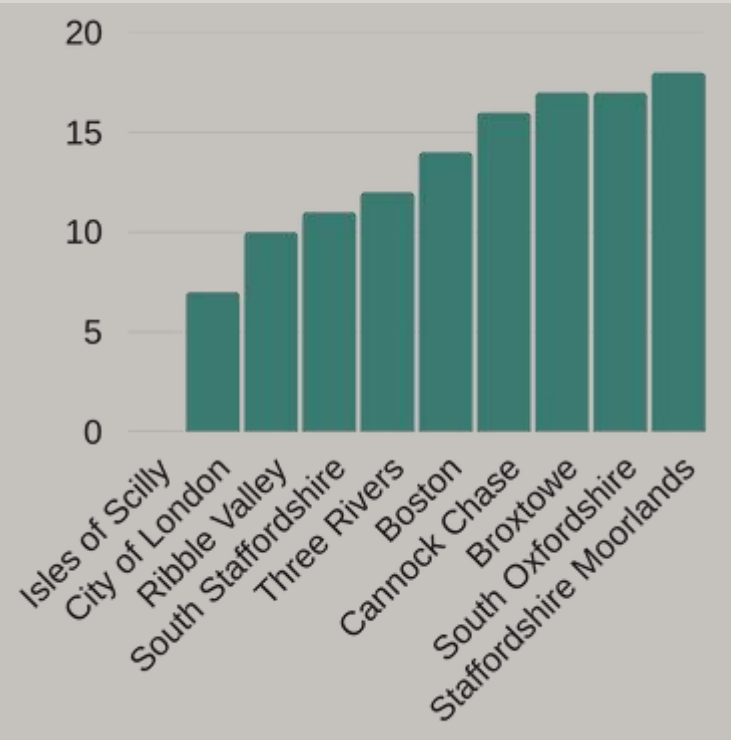

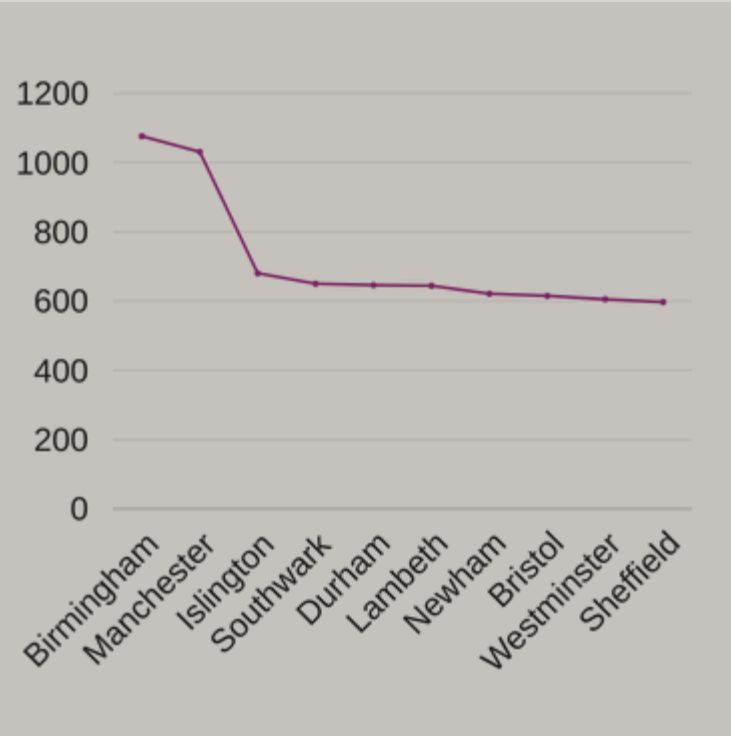

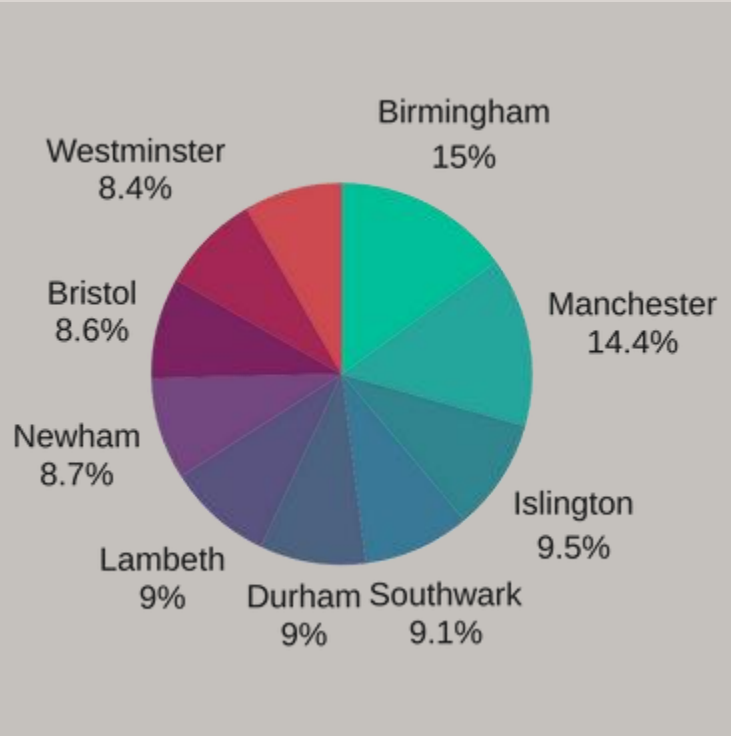

of the top 10 most impacted areas are areas in London

716

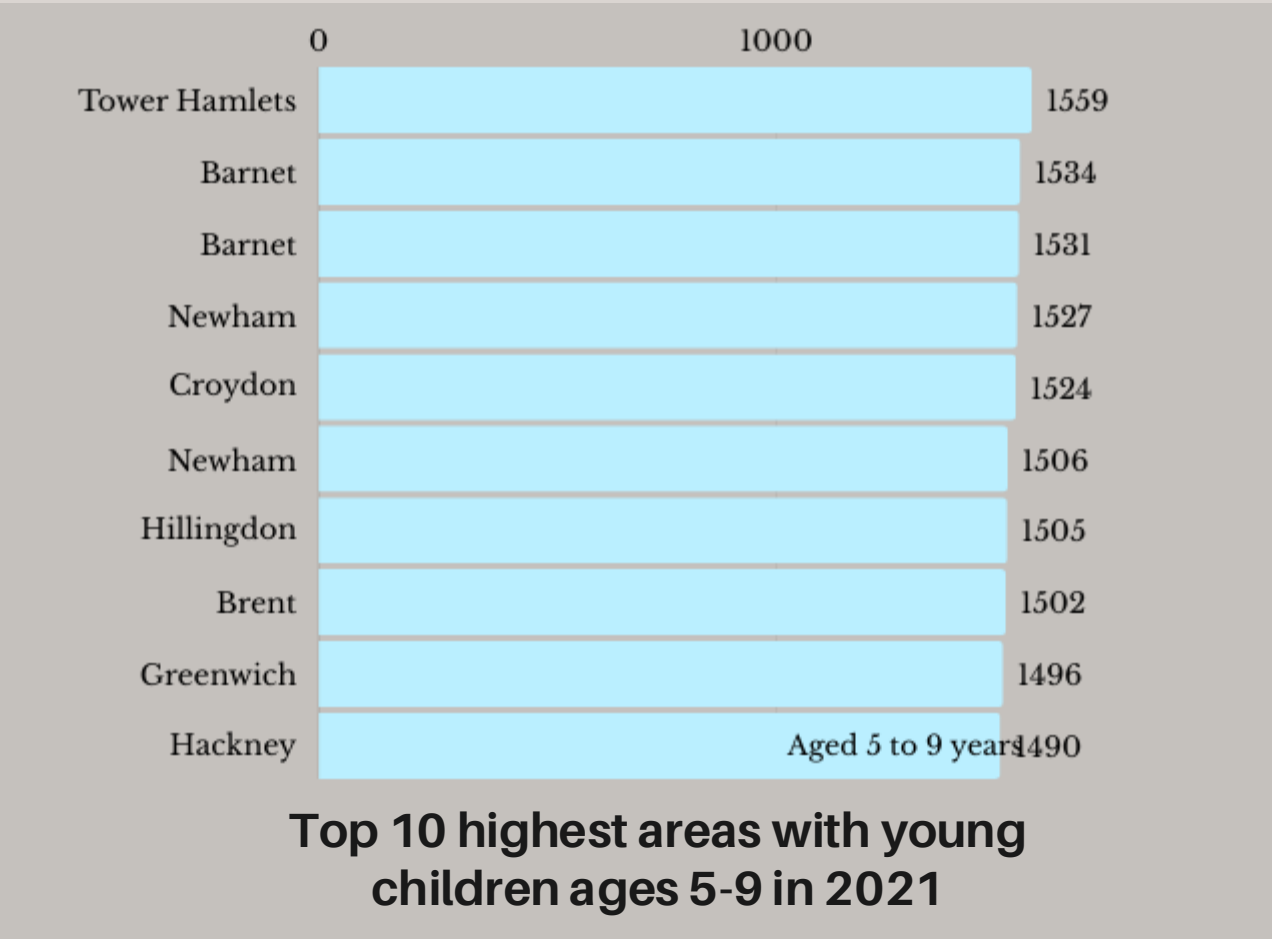

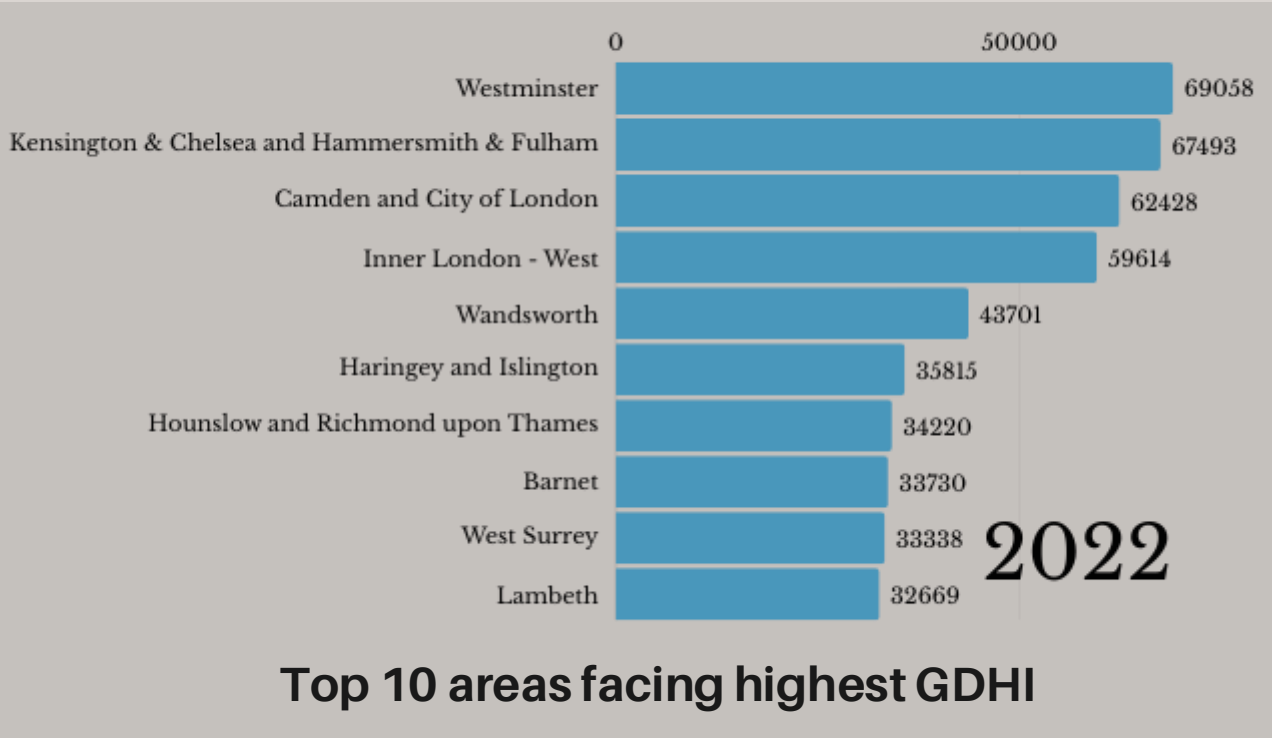

is the average number of homeless people within the top 10 impacted areas

Top 10 areas facing Homelessness

IMPACTED AREAS OF GDHI AND YOUNG CHILDREN

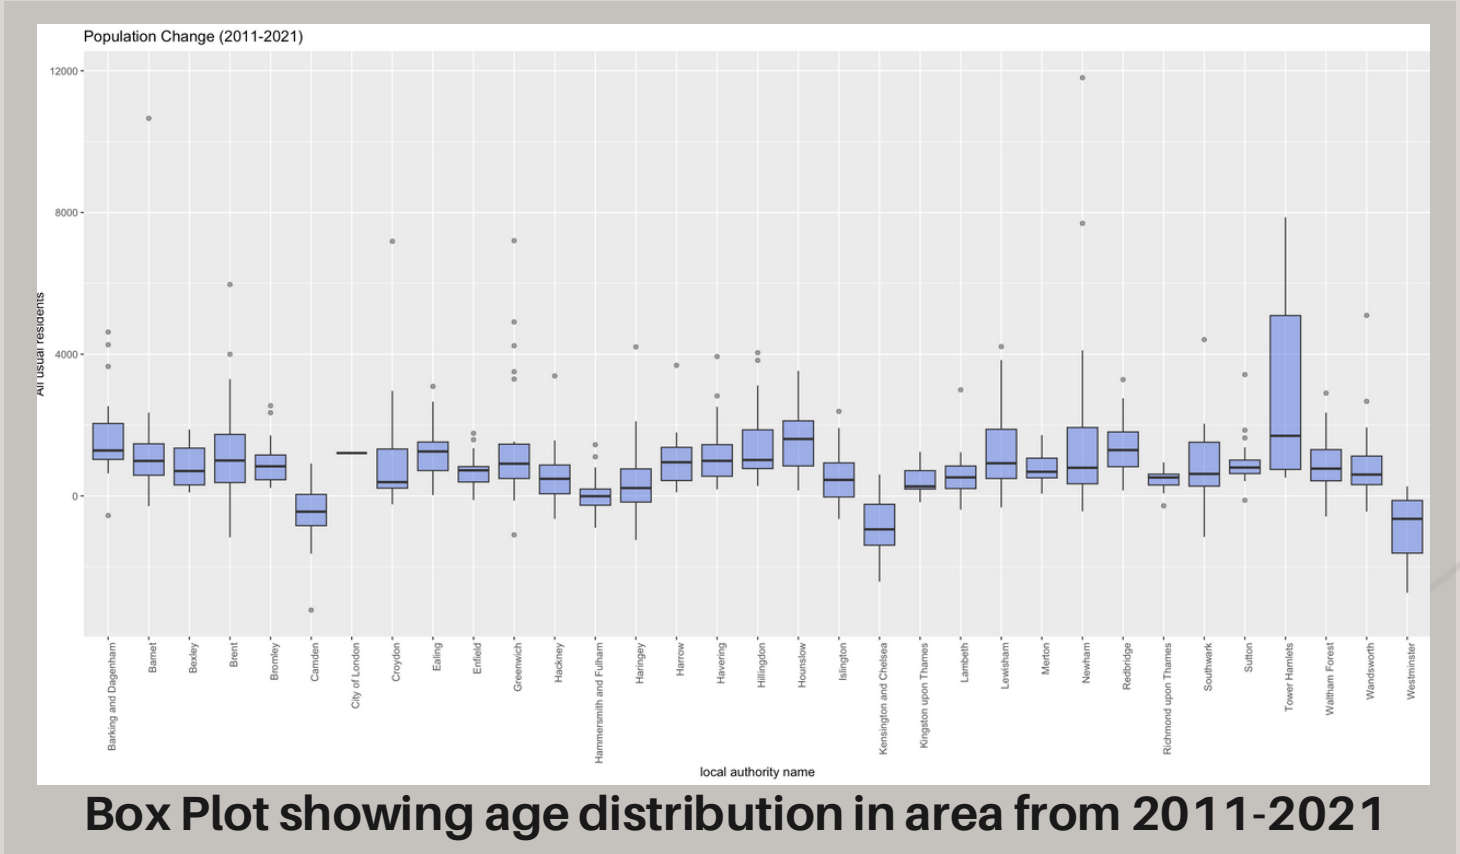

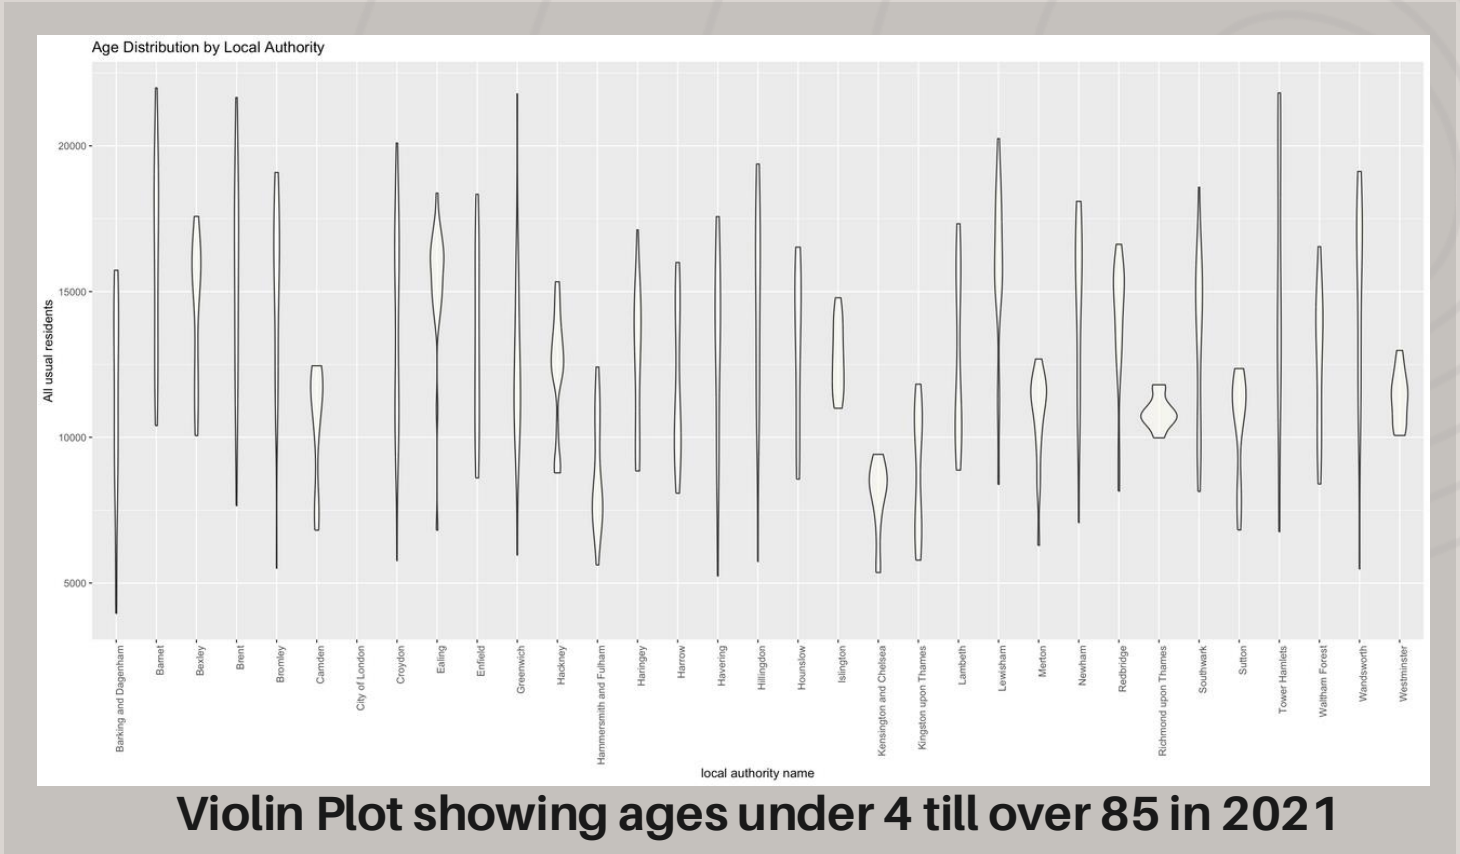

Violin shape represents the density of the population in a local authority, the wider parts show areas where many of the population values and the narrower parts show fewer people at those population levels

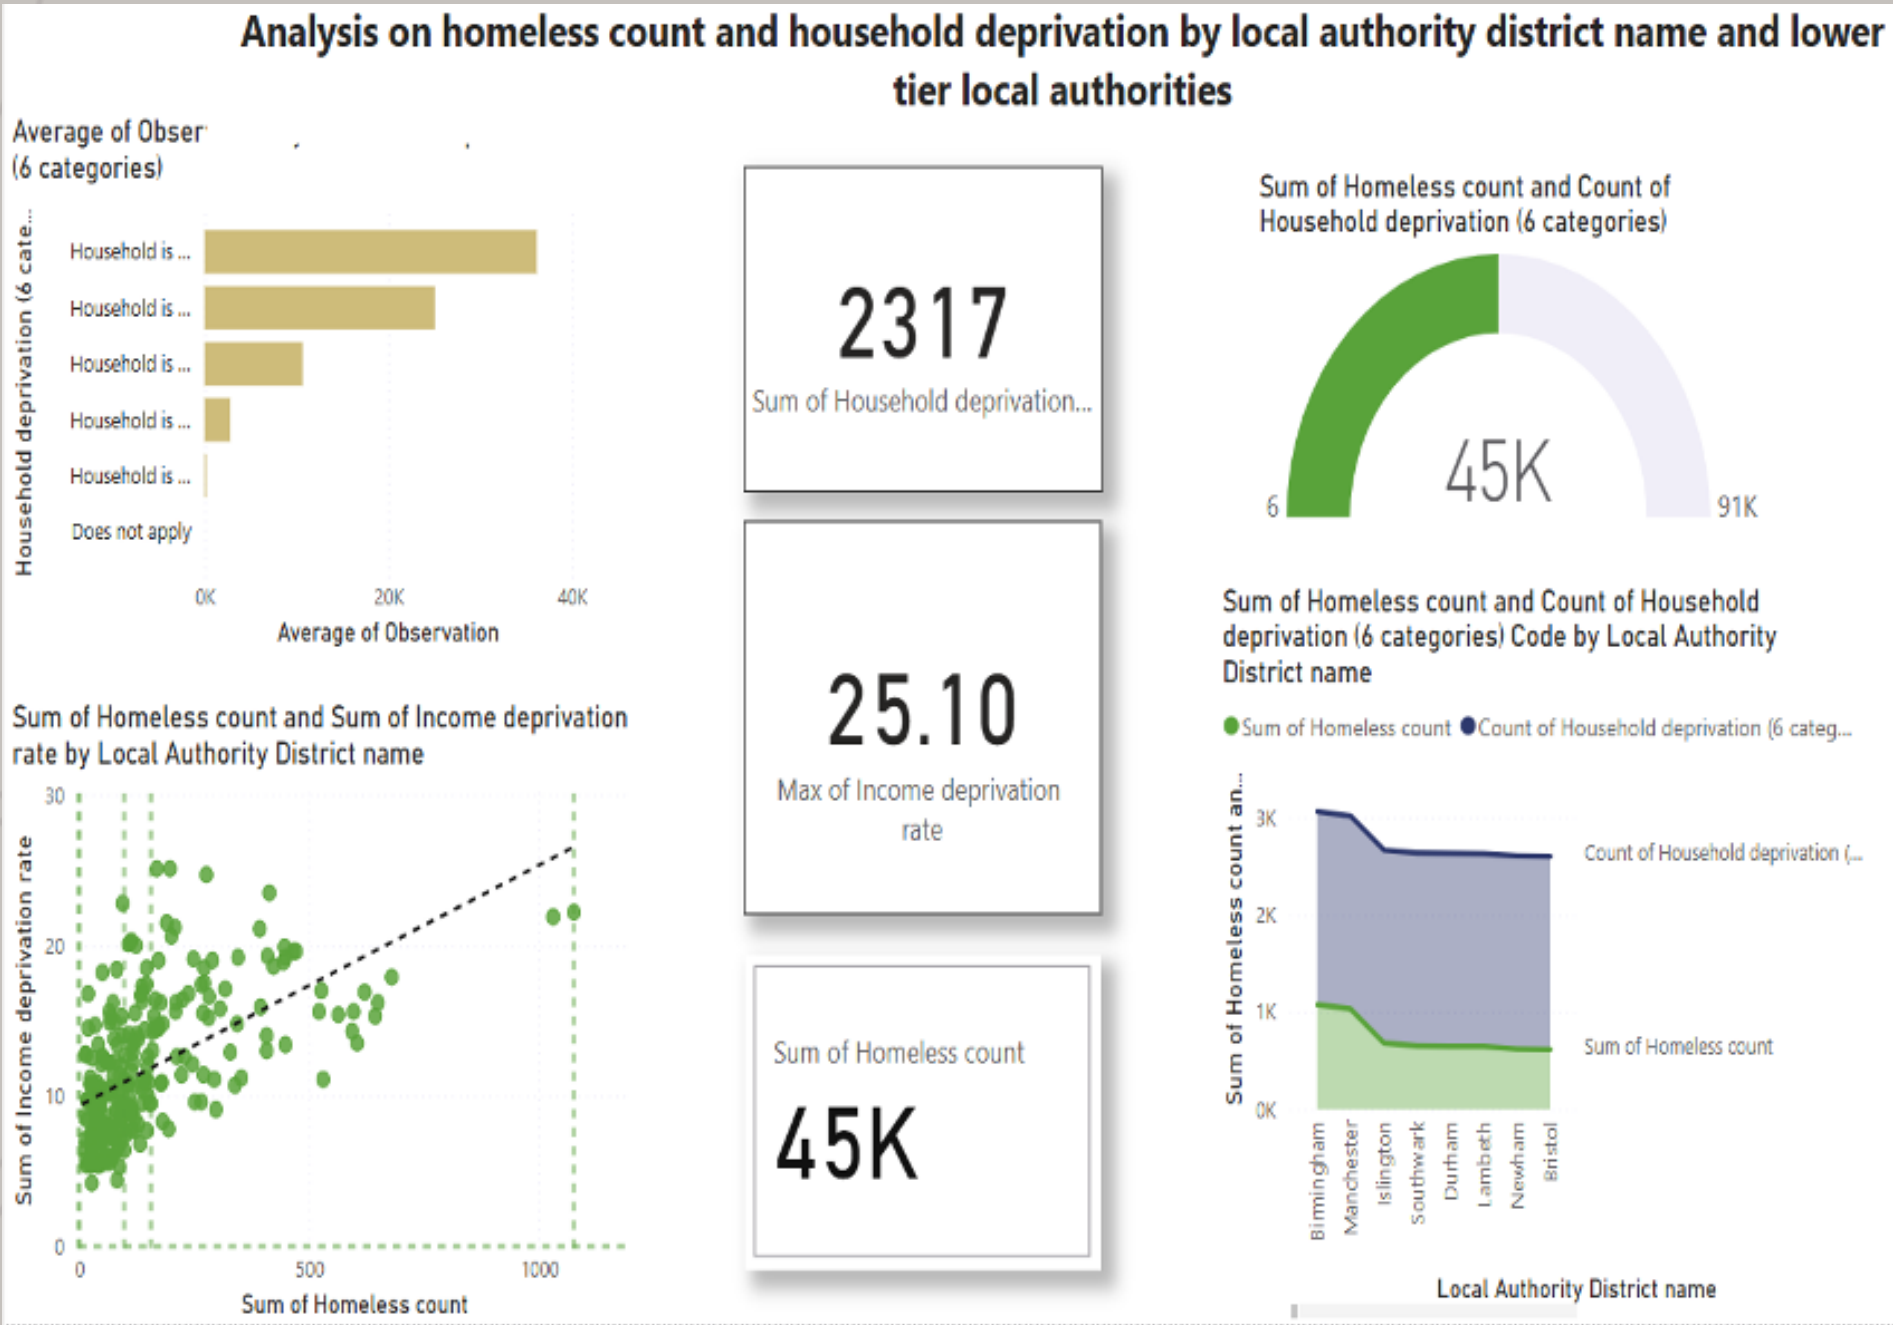

69,058

Westminster facing highest GDHI

Tower Hamlets or Sutton, have larger variations, it means that some areas had a greater rise or fall in population than other areas. - Areas with small boxes plus short whiskers point to stable population changes

IMPACTED AREAS OF HOMELESSNESS AND HOUSEHOLD DEPRIVATION

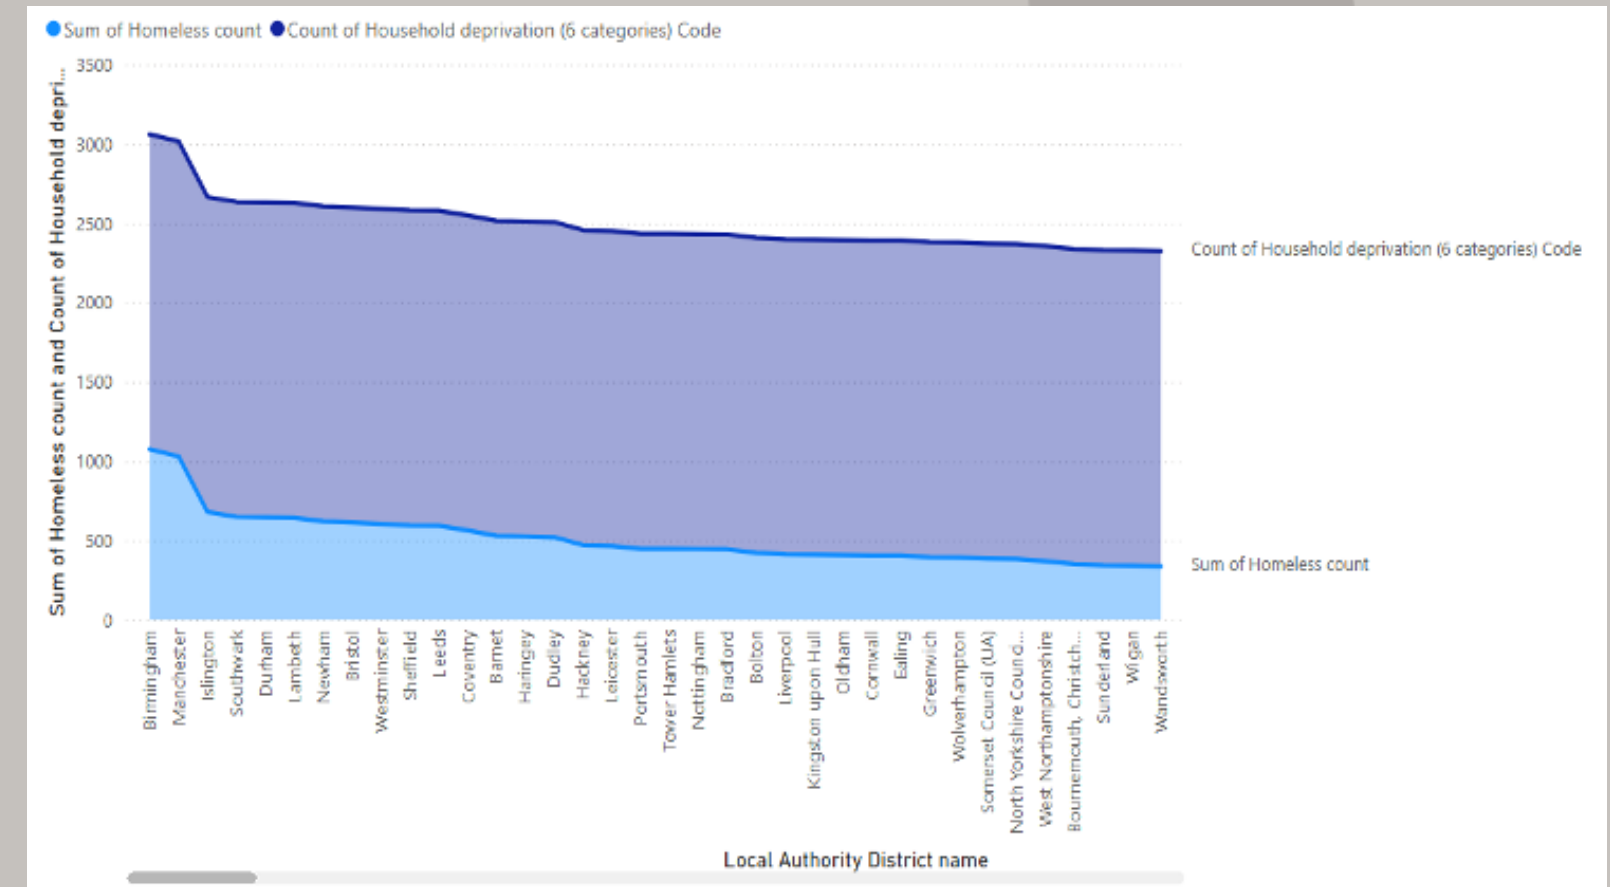

Household deprivation is consistently higher than homelessness across all districts, suggesting a strong correlation between the two

Birmingham, Manchester, and Islington have the highest levels of both homelessness and deprivation

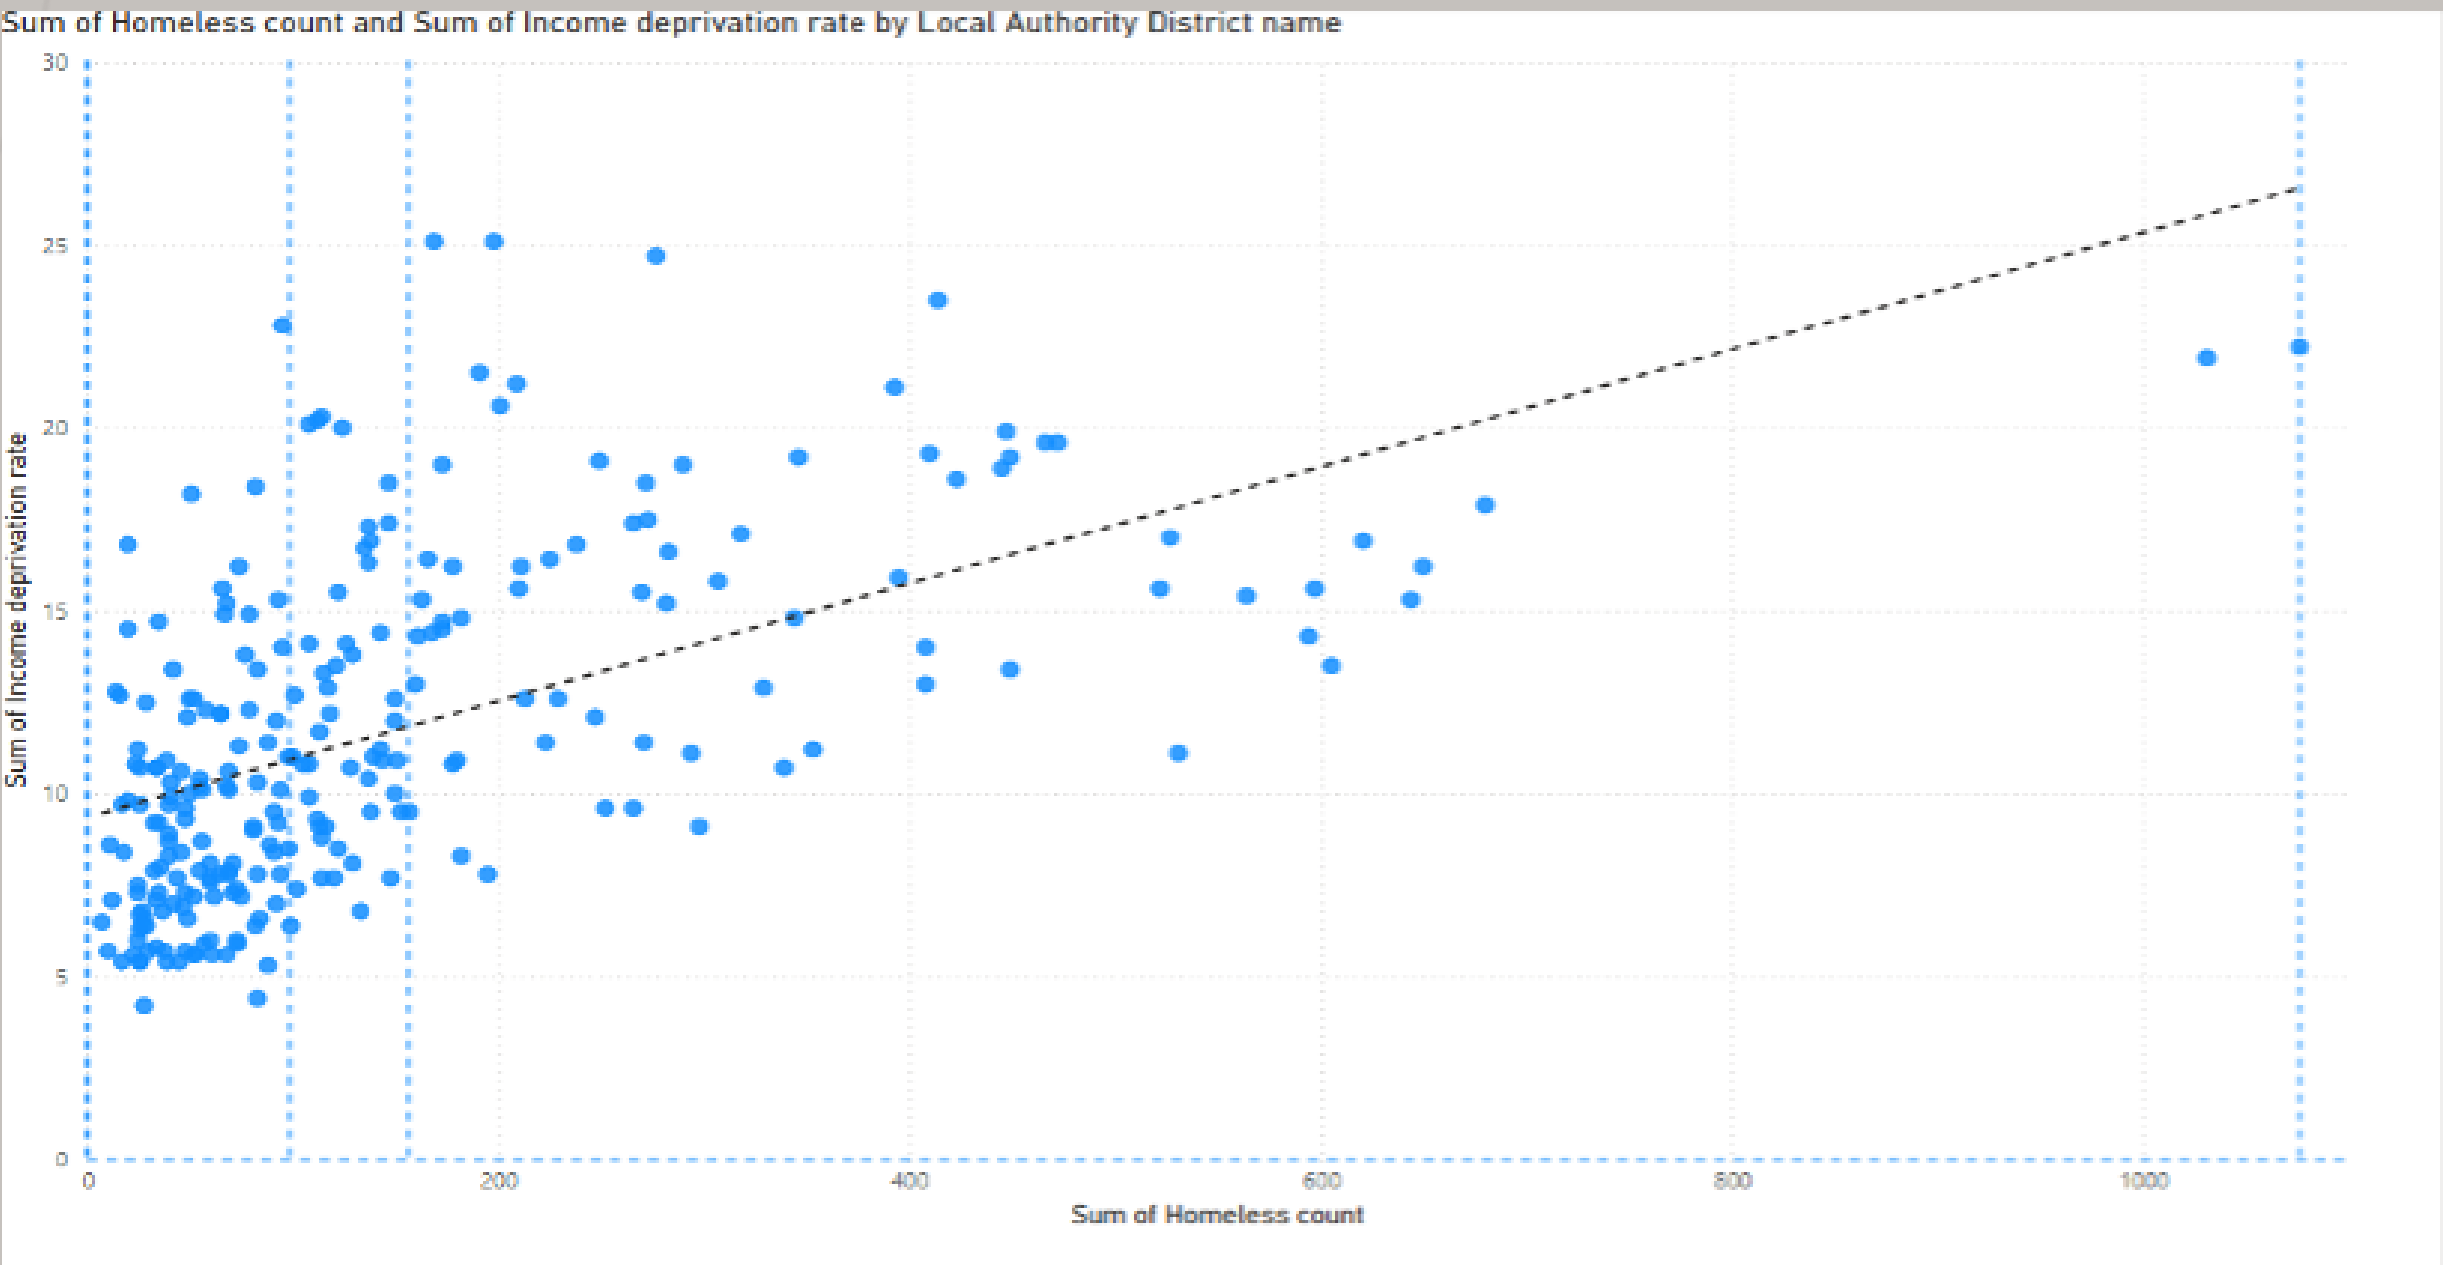

The numbers gradually decrease as you move right on the chart, indicating that some districts experience significantly lower levels of homelessness and deprivation

Some districts, such as Cornwall and Ealing, exhibit high deprivation but relatively lower homelessness levels, which may indicate effective housing policies or support systems

insights into the relationship between homelessness and deprivation, highlighting key areas where intervention may be needed

IMPACTED AREAS OF HOMELESSNESS AND INCOME DEPRIVATION

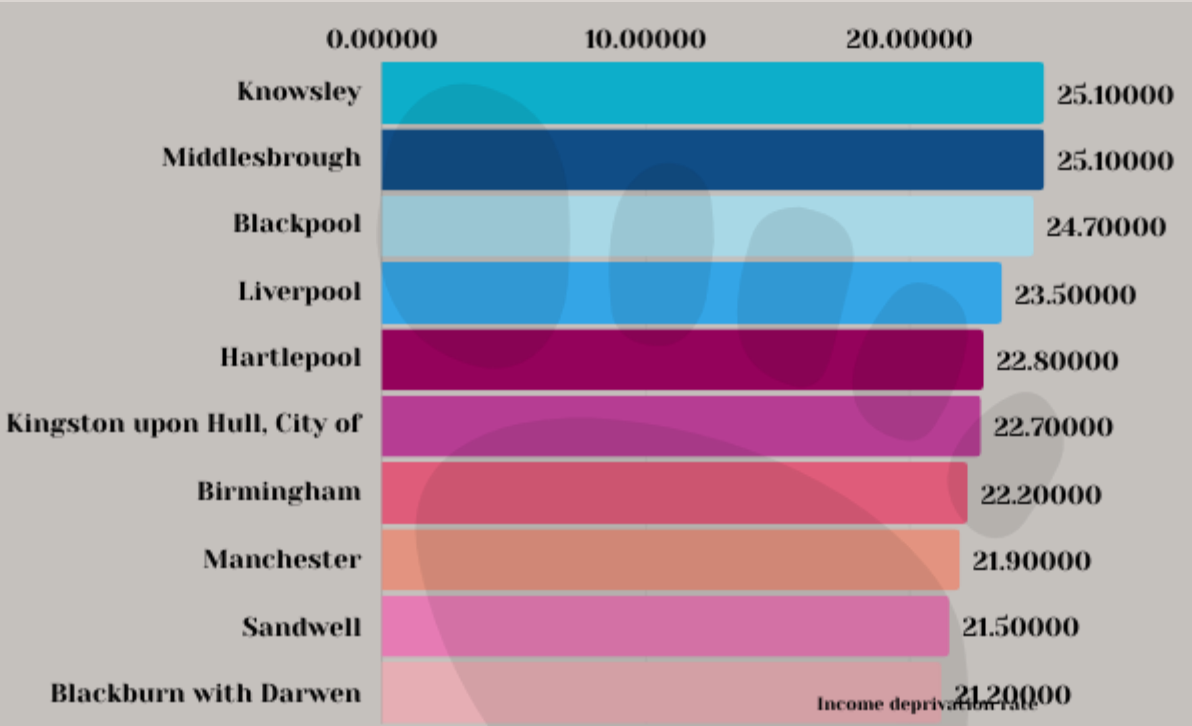

The relationship between homelessness count and income deprivation rate across different Local Authority Districts

The x-axis shows the total number of homeless individuals in each district

The y-axis represents the sum of the income deprivation rate for each district. Each blue dot corresponds to a specific Local Authority District

The plot reveals a concentration of districts with lower homelessness counts (below 200) but varying levels of income deprivation. As homelessness increases, there is a tendency for higher income deprivation rates, suggesting a potential correlation between these factors. Some districts with extremely high homelessness counts (above 1000) also exhibit high income deprivation, highlighting areas that may require focused interventions

Bar Chart Race showing the Highest Income Deprivation Rate in certain areas

Recommendation

- 1 To perhaps consider opening operations in some of Londons most deprived areas being; Islington, Southwark and Newham. Resole could also branch out and explore most impacted cities in the UK like Birmingham and Manchester**
- 2 Areas in London have a larger population of young children therefore focus on young children within the age of 5-9 to distribute shoes in areas such as Tower Hamlets**
- 3 Household deprivation consistently exceeds homelessness across all districts, indicating a strong correlation between the two. It is a critical community issue that requires greater attention and consideration.**

The background is a light gray color. It features two large, stylized footprints in a darker gray shade, one on the left and one on the right, both pointing towards the center. In the top right corner, there are several concentric circles of varying sizes, also in a light gray shade. The text "Thank You" is centered in the middle of the image.

**Thank
You**
